1. Find the text in the first paragraph (stripping out the html), then set the html of the last paragraph to show it is just text (the red bold is gone).

```
<!doctype html>
<html lang="en">
<meta charset = "utf-8">
<title> text demo </title>
<style>
P{
Color: blue;
Margin: 8px;
Span {
Color: red;
}
</style>
<script src = ""http://code.jquery.com/jquery-1.9.1.js"> </script>
</head>
<body>
<span> Test </span> Paragraph. 
<script>
< ! -INSERT YOUR JQUERY CODE HERE ----->
</script>
</body>
</html>
Answer:
```

```
Let val = $("p:first").text();
$("p:last").text(val);
```

2. Write jQuery code to create a red background for the level-2 list items.

```
    class = "item-i"> | 
    class = "item-i">|

    class = "item-a">A
    class = "item-b">B

    class = "item-1"> |
```

```
 2 
 3 

cli class = "item-c" > C 

cli class = "item-iii" > III
```

Answer:

```
$("ul li: nth-child(2) li").CSS({"background-color": "red"});
```

3. Write jQuery code to select the element that comes immediately before item three and change its background color to blue.

```
    list item 1 
    list item 2 
    list item 2 
    list item 3 
    list item 4 
    list item 5
```

Answer:

```
$("li.third-item").prev().css("background-color", "blue");
```

4. Let us one additional requirement for the "Go Vegetarian" button of the Webville Eatery Menu described in Chapter 4 of Head First jQuery: "Turkey" in the ingredient list of any entree is replaced by "Mashed Potatoes" in the vegetarian version. You may assume there is a class "turkey" that identifies these items in the list. Describe the changes to the Javascript (jQuery) code to implement this new requirement.

Answer:

```
$(".turkey).replaceWith("<em>Mashed Potatoes</em>");
```

5. Write JavaScript (jQuery) code to change the color of the parent and grandparent list items of the span of text ("some text") in the following to green.

```
<!DOCTYPE html>
   <html>
   <head>
<script>
$(document). ready (function () {
     < ! -INSERT YOUR JQUERY CODE HERE ----->
});
</script>
</head>
<body>
<div class = "ancestors">
<div> (great-grandparent)
(grandparent)
(direct parent)
<span> some text </span>
</div>
</div>
</body>
</html>
Answer:
  $('span'). parent ().css({ "color": "green" });
  $('span'). parent().css({"color": "green"});
```
